Introduction

I am a PhD candidate in Finance at Lancaster University Management School, supervised by Professors Ingmar Nolte and Sandra Nolte. My research is in high-frequency asset pricing and financial econometrics, focusing on equity factor models, market microstructure, transaction cost modelling, and portfolio rebalancing. I apply econometric and machine-learning techniques to large high-frequency datasets, such as TAQ, to study how betas and risk premia change with the frequency at which returns are measured.

Education

Lancaster University Lancaster, UK
PhD in Finance *Oct 2023 – Present*

- Supervisors: Prof. Ingmar Nolte & Prof. Sandra Nolte
- 1st Year GPA: 90%

Lancaster University Lancaster, UK
MSc in Finance *Oct 2022 – Jul 2023*

- Double degree with Universidade Católica Portuguesa (Porto): completed the full taught programmes of both universities, with a shared thesis written at Lancaster
- Thesis: *Dynamic Rebalancing Strategies Applied to Factor Portfolios*, in collaboration with Invesco Quantitative Strategies
- Final grade: 95% (dissertation: 95%)

Universidade Católica Portuguesa (Porto) Porto, Portugal
MSc in Finance *Oct 2021 – Jul 2023*

- Double degree with Lancaster University: completed the full taught programmes of both universities, with a shared thesis written at Lancaster
- Final grade: 19/20, the highest in the cohort

Universidade Católica Portuguesa (Porto) Porto, Portugal
BSc in Economics *Sep 2017 – Jun 2021*

Research Papers

The Frequency Term Structure of Equity Factors *Work in Progress*
with Ingmar Nolte & Sandra Nolte

- Traces the term structure of Fama–MacBeth betas and risk premia for the Fama–French six-factor model and the Jensen–Kelly–Pedersen factor zoo across sampling frequencies from one second to one month, plus a dedicated overnight series, on a novel high-frequency zoo of 662 factors built from 5,961 U.S. stocks (2014–2024).
- Implements Shanken-corrected Fama–MacBeth and the large- N bias-adjusted WLS estimator of Raponi, Robotti, and Zaffaroni, and derives a closed-form rebalancing-drag correction for cross-frequency risk-premium comparisons.
- Preliminary findings: the factor structure is not scale-invariant; the market factor and momentum are priced across most of the term structure while HML, CMA, and RMW are not; the daily frequency marks a break; and the overnight regime differs from both adjacent regimes.
- Presented at the 5th Frontiers of Factor Investing Conference (2026).

Work Experience

Doctoral Research Associate

Lancaster University Management School

Lancaster, UK
Oct 2023 – Present

- Conduct original research towards completion of a PhD in Finance, while actively contributing to academic activities within the department.
- Responsibilities include writing academic working papers, marking undergraduate and postgraduate coursework and exams, delivering tutorials, and providing general academic support.

IQS Research Intern

Invesco EMEA

Frankfurt, Germany
Jun 2023 – Sep 2023

- Conducted my MSc thesis research on dynamic rebalancing strategies applied to factor portfolios within the systematic investing research team (Invesco Quantitative Strategies).

Intern

Banco Carregosa

Porto, Portugal
Jul 2022 – Aug 2022

- Researched and presented alternative asset investment strategies for the Wealth Management department.
- Assisted in a quantitative analysis of different asset class performance for the Asset Management department.
- Generated and presented research on news with macroeconomic relevance for the Asset Management department.
- Shadowed and engaged with Sales & Trading professionals.

Infantry Sergeant

Portuguese Army

Portugal
Sep 2015 – Jul 2017

- Commanded an infantry platoon in the execution of general military tasks, e.g., perimeter security and arsenal maintenance.
- Academic Merit Award (Nov 2015): highest academic grade (17.82/20), across written and practical tests, of 100+ recruits in basic training at the Regimento de Transmissões (Porto).

Teaching

Workshop Tutor, Financial Econometrics (MSc)

Lancaster University Management School

2024 – 2026

- Teaching Excellence Certificate in 2024–25 and 2025–26 (student rating of 5/5)

Workshop Tutor, Quantitative Methods for Finance (MSc)

Lancaster University Management School

2024 – 2026

Workshop Tutor, Quantitative Methods for Financial Management (MSc)

Lancaster University Management School

2024 – 2026

Associate Fellow of the Higher Education Academy (AFHEA)

Higher education teaching qualification (UK)

Conferences and Academic Service

5th Frontiers of Factor Investing – Presenter and organising team

Lancaster University Management School

2026

17th Annual SoFiE Conference – Attendee

ESSEC Business School

2025

4th Frontiers of Factor Investing – Organising team

Lancaster University Management School

2024

Honours and Awards

Chancellor's Medal

Nov 2023

Lancaster University

- University-wide award for exceptional merit, given to students averaging 95% or above in their modules or dissertation (achieved in both)

Best Overall Performance and Dissertation, MSc Finance

Oct 2023

Lancaster University Management School

- Prize for the best student in the MSc Finance cohort, on overall grade and dissertation

1st Place, "ChampionChip" Portfolio Management Competition

May 2022

Católica Porto Investment Club and FEP Finance Club

- Team of two; built an investment strategy and portfolio for a given investor profile, first as a written report, then in a live presentation adapting to profile changes announced on the day
- Judged by finance academics and industry professionals; the prize included an internship at Banco Carregosa

Merit Scholarship, MSc Finance

2022 – 2023

Universidade Católica Portuguesa (Porto)

- Awarded for performance in the first term and renewed through to the end of the programme

Student Activities

Senior Quant Analyst, LU Ghosal Investment Fund (Lancaster University)

Oct 2022 – Sep 2023

Equity Analyst, Católica Porto Investment Club (remote)

Oct 2022 – Sep 2023
